EXPERIENCE

Co-Founder & CTO, Baakas 1 yr

Fashion marketplace mobile app — independent venture

- Built and shipped a fashion marketplace app end-to-end, from product design through backend and release, now live on Google Play.
- Owned the full stack alone: mobile client, API, database schema, and deployment, while iterating directly on user feedback.
- Made the core product, technical, and prioritization decisions for a live, user-facing marketplace over a full year.

PROJECTS

Baakas Live on Google Play

Flutter · Firebase (Backend & Database)

- Fashion marketplace connecting local sellers and buyers with listings, search, and order flows.
- Designed the MongoDB data model and REST API powering catalog, cart, and order management.

PersonalFitness Live on Google Play

Kotlin, Android

- Native Android app for workout tracking, water intake, goal setting, and progress visualization.
- Built local persistence and progress-tracking logic used daily by real users, published and maintained on Google Play.

NepseInvest

Flutter, Node.js, MongoDB

- Stock market learning app teaching NEPSE (Nepal Stock Exchange) fundamentals through interactive lessons and simulations.
- Built the Flutter client and a Node.js/MongoDB backend to serve lesson content and track learner progress.

BrainRot In Progress

Dart, Flutter

- Screen-time tracking app that surfaces daily usage patterns to help users cut down on distraction.

EDUCATION

Tribhuvan University Expected 2029

Bachelor of Computer Applications (BCA) · 4th Semester

SKILLS

Languages: Kotlin, Dart, JavaScript/Node.js

Mobile: Flutter, Android (Kotlin)

Backend & Data: Node.js, MongoDB, Firebase

Tools: Git, GitHub, Docker, Linux

ACHIEVEMENTS

- Published 2 apps on Google Play, with 2 more in progress toward release.
- Built and shipped an app that reached 5,000+ users.
- Competed in hackathons ranging from intra-college to inter-college level.

LANGUAGES

Nepali (Native) · English (Professional working proficiency)
